

Tender Vessel Bareboat Hire

"Plucka" is a 4.6m polyethelene zodiac style centre console originally set up as a tender to larger commercial vessels but now available in its own right for works under a C Class (survey exemption) license. The rounded hull and forgiving polyethelene (plastic) construction are inherently suited to pushing up against other watercraft and objects without damage to either vessel. The vessel has also been fendered bow and stern to allow crew transfer forward and to protect the outboard to the rear. Fitted with a Yamaha F70 (70hp fourstroke) outboard she is quiet and efficient. The vessel is extremely stable, has extensive safety railing and safe access/egress.
